

Communication phases

Parameter mode

allows writing access to all drive parameters which are not password protected

Operating Mode

allows only writing access to all drive parameters which can be changed in operation (particularly transmitted cyclically)

Display:

OM – Operating Mode

bb – Ready for operation (betriebsbereit)

Ab – Drive is ready (Antrieb bereit)

Communication phases

Baud rate scan

Drive is searching for supported baud rate

Closing SERCOS loop

when the SERCOS loop is closed, the master is switching to communication phase 1

Drive identification

when all the programmed drive addresses are existent the master switches to communication phase 2

Parameterization mode

acyclic parameter communication

Limited parameter mode

and check of parameter values

Operating mode

cyclically communication with master control

Display of the status

Status diagnostics

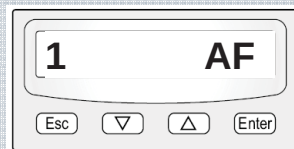

"Ready for operation" (betriebsbereit)
24V OK,
(main power can be switched on)

"Drive is ready" (Antrieb bereit)
Control and Power Section is ready for
operation (24V and DC voltage are OK)

"Drive HALT" (Antrieb Halt)
Axis standing still with defined torque
(Axis is not responding on command value)

"Drive enabled" (Antrieb Freigabe)
Drive is following the command value
